BillPro™ BILL ACCEPTORS

Coinco's new BillPro bill acceptor features improved reliability and our innovative FlexStack™ bill box.

- √ Increase vending sales
- √ Reduce operating costs

KEY BENEFITS

- Innovative Flexstack bill box expands to hold up to 650 bills.
- New bill path clearing software routine. Bill transport reliability improved by 110%.
- New anti-cheat device reduces fraud.
- Flash programmable microcontroller. Simplifies upgrades for future feature additions.
- Dual optic and magnetic validation technology. Provides highest bill acceptance rates available.
- Illuminated inlet. Simplifies trouble-shooting and captures attention for more vends.

COINCO's BillPro™ SERIES BILL ACCEPTOR

Coinco's new BillPro bill acceptor features increased reliability and our expandable FlexStack bill box.

- Model BP2BX For cold drink vending machines
- Model BP2BXM For cold drink vending machines with high security mask
- Model BP4SX For full line vending machines

KEY FEATURES

- MDB (Multi-Drop Bus) Interface
- Accepts US \$1, \$5, \$10 and \$20 bills
- FlexStack bill box expands to hold up to 650 bills
- Magnetic and optical validation technology
- New bill path clearing software routine
- New anti-cheat device
- Illuminated inlet
- Flash programmable memory
- Rugged design withstands harsh environments

More reliable.

Highest acceptance rate available.

- Bills are validated through 120 optical readings and 560 magnetic readings to assure authenticity.
- State-of-the-art software enhances bill handling.
- Illuminated inlet attracts more customers.
- New, anti-cheat device reduces fraud.
- Status indicator conveys maintenance information for easy trouble-shooting.
- Spherical I-frame increases bill acceptor reliability and reduces bill handling errors.
- Water protection enclosure protect PCBs from saltwater contamination.
- Enhanced bill path clearing software reduces maintenance issues associated with attempted fraud.

More flexible.

Easier to install, service and update for future currency changes.

- Main electronics and circuit board located inside the lower-housing for compact design and easy installation.
- Simple integrated harness with quick disconnects allows for quick field installation and serviceability.
- Flash programmable micro-controller makes it easy to upgrade and program for new bills or coupons.

More expandable.

With the FlexStack bill box, one size fits all.

- Expands from standard 300-note bill box to hold up to 650 bills.
- New FlexStack allows maximum capacity regardless of vending machine constraints.
- Greater bill box capacity reduces machine visits.
