

For a
changing
world

QuantumPro™

Coinco's dependable four-tube changer is now more reliable and has new value-added features.

FEATURES & BENEFITS

- New jam clearing payout routine. Payout reliability improved by 250%.
- Faster payout time by up to 40%.
- Advanced coin validation technology.
- Flash programmable microcontroller. Simplifies upgrades for future feature additions.
- Multiple interface options.
- Electronic acceptance of up to 16 different coins. Adaptable to new coins and tokens.
- Programmable payout. Reconfigure payout using inventory buttons. No service tools required.
- Hinged front door and acceptor coin load position for quick servicing.
- Quick and easy tube changeout.

COINCO QuantumPro™ 700 SERIES COIN CHANGERS

A quantum leap in payout speed and reliability. Add improved coin discrimination and the ability to make field upgrades, and you have a total change-making solution.

For New Electronic Vending Machines with MDB Interface

USQ-G700

4 Coin Tubes are available in the different coin payout combinations shown below for models USQ-G700 (MDB) and USQ-S700 (Single Price). Tubes are individually changeable for different combinations of 4 coins. Tubes are installed in order shown.

For Full Line Vending Machines with Logic Interface and 24-Volts

USQ-L700

4-Tube Logic interface permits use of QuantumPro changer in older 24-volt, 15 pin machines. Also includes MDB interface. Two combinations of different coin tubes are available: You select, and specify either #701 or #702, shown in chart below.

For Electromechanical, Cold Drink Machines

USQ-S700

110 volt, single price and MDB interface. Interfaces with all Coinco dollar bill acceptors. DEX/UCS Interface Data Retrieval. Available in the different combinations shown on chart below.

Your Choice of Coinco QuantumPro™ 700 4-Tube Payout Combinations for ordering Models USQ-G700 and USQ-S700							
#701	\$1.	.10	.05	.25		#709	.25 .05 .05 .25
