

For a
changing
world

Vortex[®] Changer

Coinco's new Vortex changer is an innovation in coin changer capacity and simplicity.

- ✓ Increase vending sales
- ✓ Reduce operating costs

KEY BENEFITS

- High capacity coin hopper design eliminates payout reconfiguration.
- Coin Hoppers hold up to 125 dollar coins, 200 quarters, 460 dimes and 220 nickels, all within a standard footprint.
- Positive payout detection ensures proper coin delivery.
- Programmable coin capacity levels maximize vends while minimizing coins in the changer.
- Flash programmable microcontroller. Simplifies upgrades for future feature additions.
- Electronic acceptance of up to 16 different coins. Adaptable to new coins in the future.
- Field-proven, advanced coin validation technology.
- \$1 coin hopper offers efficient change-making for \$5 bill acceptance.

COINCO's Vortex® COIN CHANGER

Revolutionary hopper payout technology eliminates the need to manage tube configurations. Simplicity and unmatched coin capacity makes Vortex ready for future price changes.

KEY FEATURES

- MDB (Multi-Drop Bus) Interface
- Accepts US 5¢, 10¢, 25¢ and \$1 coin.
- Dispenses US 5¢, 10¢, 25¢ and \$1 coin.
- Field-proven validation technology
- Super high-capacity hoppers
- Tilt-out coin hopper for easy loading
- Payout sensors ensure coin delivery
- Programmable coin capacity levels (Float Mode)
- Rugged design withstands harsh environments

More economical.

- Coin hoppers hold up to 125 dollar coins, 200 quarters, 460 dimes and 220 nickels, reducing change starvation issues.
- Field-proven, advanced validation technology reduces counterfeit loss.
- Programmable float levels to effectively manage coin inventory.

Manage your money not your payout configurations.

Model VTX100 - 5¢, 10¢, 25¢ payout

Model VTX101 - 5¢, 25¢, \$1 payout

For available models, see our website:

www.coinco.com/coin/products/vortex.asp

Simpler to operate.

- Coin hoppers tilt-out for easy loading, with individual bin access.
- One size fits all. Improved capacity through tubeless design eliminates reconfigurations.
- See-through coin bins let service personnel view coins without removing the coin changer.
- Easy coin management with removable single-piece hopper design.

More reliable.

- Payout sensors detect coin dispense ensuring customers will receive proper change.
- Flash memory makes Vortex easy to upgrade and program for future feature additions.
- Each Vortex changer passes 47 rigorous quality assurance tests.
